PROFILE

Backend Software Engineer with 3.7+ years of experience building Spring Boot microservices, REST APIs, and SQL-based systems at scale. Experienced in Java, PostgreSQL, Spring Security, API design, and SQL optimization and performance testing for high-availability LMS platforms serving millions of users.

TECHNICAL SKILLS

- **Languages:** Java, SQL, JavaScript
- **Backend:** Spring Boot, Microservices, REST APIs, Hibernate
- **Frontend:** React, Angular, JSP, HTML, CSS
- **Databases:** PostgreSQL, MySQL, Oracle
- **Testing:** JUnit, Integration Testing
- **Tools/Platforms:** Git, Jenkins, CI/CD, Postman, Aladdin, Jira, Azure
- **Concepts:** Data Structures & Algorithms (DSA), System Design, Low Level Design (LLD), High Level Design (HLD)

WORK EXPERIENCE

Anthology International Pvt. Ltd | Bengaluru

Blackboard Ultra Learn (LMS product) | Software Engineer I, Product Development **July 2022 - Present**

- **Backend Development**: Built and optimized ***REST APIs*** and ***microservices*** with ***Spring Boot*** for Blackboard Ultra, delivering scalable LMS features used by millions of students and instructors.
- **Frontend Development**: Maintained legacy ***Angular*** and ***JSP*** code and contributed to the migration to ***React***, ensuring seamless end-to-end feature delivery and improved user experience.
- **System Performance:** Performed post-development performance testing (regression, focus, Chrome profiler) on Captain instance with standardized datasets. Benchmarked results against ***Aladdin*** and ***New Relic*** baselines to ensure stability, reliability, and system availability.
- **Code Quality & Testing**: Leveraged ***GitHub Copilot*** to write clean, optimized code following best practices. Implemented ***JUnit*** and ***integration tests*** for Spring Boot services, reducing production defects by ~90% in the assigned value stream.
- **Collaboration:** Collaborated with PMs, SMEs and UI/UX designers to gather requirements and implement 14+ major product features, ensuring delivery on time with customer satisfaction.
- **Agile Leadership:** Facilitated ***Scrum activities*** such as sprint planning, standups, and retrospectives when required. Also led multiple projects with small teams (2–3 developers), coordinating tasks and ensuring timely delivery of features.

PROJECT

Dynamic Portfolio | React, TypeScript, Tailwind, Framer Motion, Java, Spring Boot, PostgreSQL

- Built backend services using Spring Boot and PostgreSQL to manage portfolio content via REST APIs.
- Applied layered architecture, DTOs, and input validation for maintainable and scalable backend design.
- Integrated backend APIs with a React frontend using Context API for real-time updates.

Repository: https://github.com/dilan-nayak/dynamic_portfolio

Local Drop | Java, Spring Boot, Web Sockets, AES-256, RSA-4096

- Developed a LAN-based file and clipboard sharing application without internet dependency.
- Implemented REST APIs for file transfer and WebSocket-based real-time clipboard synchronization.
- Applied AES-256 and RSA-4096 hybrid encryption to ensure files are encrypted at rest and only decrypted by intended peers.

Repository: https://github.com/dilan-nayak/localdrop

ADDITIONAL INFORMATION

- **Education: Computer Science and Engineering**

  Trident Academy of Technology, Odisha | Aug 2017 -Jul 2021
- **Languages:** English, Hindi, Odia.
- **Awards/Activities:** Awarded for "Accountability and Integrity" in 2023 for the development of features in the Ultra Learn application.
